WASHING AND TREATING

LAVAGGI E TRATTAMENTI

LAVAGGI E TRATTAMENTI

Al fine di garantire un livello elevato di standard qualitativi, ACERBIS effettua nei laboratori interni e accreditati una serie di test sulle materie prime che compongono ogni singolo capo di abbigliamento. I nostri tecnici suggeriscono di seguire scrupolosamente le indicazioni riportate sull'etichetta di manutenzione. Così facendo le caratteristiche di performance dei tessuti rimarranno più durature nel tempo.

ETICHETTA

Ogni capo di abbigliamento è corredato da una specifica etichetta di manutenzione che suggeriamo di seguire esattamente quando sarà effettuata la manutenzione dell'indumento.

CONSIGLI GENERALI PER LA MANUTENZIONE

Non lasciare che lo sporco penetri nel tessuto. Lavare il capo appena possibile.

In caso di macchie particolarmente persistenti, versare del detersivo direttamente sulla zona interessata, lasciare agire per qualche minuto e poi procedere con il lavaggio riportato nell'etichetta di manutenzione.

Se l'indumento è particolarmente sporco, prevedere un ammollo con detersivo in una bacinella per un paio d'ore prima di procedere al lavaggio riportato nell'etichetta di manutenzione.

Lavare separatamente i colorati e gli indumenti chiari da quelli scuri. Lavare preferibilmente al rovescio ogni capo di abbigliamento.

Prima del lavaggio assicurarsi di avere chiuso bene cerniere e zip per evitare che altri capi di abbigliamento vengano a contatto con questi accessori rischiando lesioni nel tessuto.

Lavare singolarmente indumenti e accessori provvisti di Velcro.

WASHING AND TREATING

To guarantee the highest quality standards, ACERBIS undertakes a series of tests on the raw materials used in every one of its garments, in its internal and accredited laboratories. Our technicians recommend keeping strictly to the instructions on the maintenance labels. This will ensure that the performance characteristics of the fabrics will last in time.

LABEL

Each garment has a specific maintenance label. We highly recommend following these instructions when maintaining the garment.

GENERAL RECOMMENDATIONS MAINTENANCE

Do not allow dirt to penetrate the fabric. Wash the garment as soon as possible.

In the case of particularly stubborn stains, put some detergent directly onto the area concerned, allow it to act for a few minutes then continue with washing operations as stated on the maintenance label.

If the garment is particularly dirty allow it to soak in a basin with water and detergent for a few hours before proceeding with the washing instructions stated on the maintenance label.

Wash coloured garments separately, and wash light colours separately from dark colours.

It is advisable to turn each garment inside out before washing.

Before washing check that all zips are closed and all fastenings fastened in order to avoid damaging other garments that could come into contact with these accessories.

Wash garments and Velcro accessories separately.

TECNOLOGIE

ACERBIS DRY SYSTEM

La traspirabilità è la capacità di un tessuto di assorbire il sudore e facilitarne la naturale evaporazione garantendo freschezza e comfort per tutta la durata dell'esercizio fisico. Un elevato potere traspirante favorisce quindi il ricircolo di aria tra l'ambiente esterno ed il capo stesso. Per un comfort ottimale durante l'attività sportiva e non solo, è sempre indispensabile indossare capi i cui tessuti siano perfettamente traspiranti. Il sudore deve asciugare rapidamente così da non rimanere a lungo contatto con la pelle, permettendo di conseguenza, una naturale termo-regolazione corporea, riducendo il dispendio energetico, fornendo un maggiore comfort e mantenendo la pelle sempre fresca ed asciutta. I capi realizzati con tessuto Acerbis Dry System sono perfetti sia in inverno, perché aiutano a mantenere caldi i muscoli, sia in estate, perché asciugano rapidamente permettendo di rimanere freschi ed asciutti.

Breathability is the ability of a fabric to absorb sweat and facilitate its natural evaporation, guaranteeing freshness and comfort for the duration of the physical exercise. A high breathability therefore promotes air circulation between the external environment and the garment itself. For optimal comfort during sports and more, it is always essential to wear garments whose fabrics are perfectly breathable. Sweat must dry quickly so as not to remain in contact with the skin for a long time, thus allowing natural body heat regulation, reducing energy expenditure, providing greater comfort and keeping the skin always fresh and dry. Garments made with Acerbis Dry System fabric are perfect both in winter, because they help keep the muscles warm, and in the summer, because they dry quickly allowing you to stay fresh and dry.

SUBLIMATION PRINTING

La stampa sublimatica è un processo di stampa indiretto nel quale il disegno viene trasferito sul tessuto attraverso la sublimazione. Si realizza grazie a particolari stampanti che utilizzano specifici inchiostri sublimatici per imprimere su un apposito supporto il disegno desiderato. Successivamente la carta stampata viene accoppiata al tessuto ed il disegno viene trasferito utilizzando macchinari che, esercitando la giusta pressione alla corretta temperatura fanno sublimare i colori imprimendo il disegno desiderato sul tessuto.

Sublimation printing is an indirect printing process in which the design is transferred onto the fabric through sublimation. It is realised thanks to special printers that use specific sublimation inks to impress the desired design on a special support. Subsequently the printed paper is coupled with the fabric and the design is transferred using machinery which, by exerting the right pressure at the correct temperature, makes the colours sublimate by impressing the desired design on the fabric.

EMBOSSED

Con il termine embossing si indica una particolare tecnica di stampa a rilievo. Il tessuto viene introdotto in specifici macchinari che, esercitando sullo stesso la giusta pressione alla corretta temperatura, imprimono il disegno desiderato creando un effetto di lucido ed opaco.

The term embossing refers to a particular relief printing technique. The fabric is introduced into specific machines which, by exerting the right pressure on it at the right temperature, print the intended design by creating a glossy and matt effect.

ANTIBACTERIAL TREATMENT

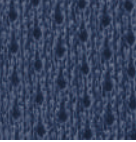

Tattamento effettuato sul tessuto per contrastare la proliferazione batterica, evitando così la formazione di sgradevoli odori e la compromissione dell'igiene. Il trattamento antibatterico non altera la mano ed l'aspetto del tessuto.

Treatment carried out on the tissue to counteract bacterial proliferation, thus avoiding the spread of unpleasant odors and the impairment of hygiene. The antibacterial treatment doesn't alter the handle and the appearance of the fabric.
